

COVID-19

Requirements for tour groups

As Kurrajong Recycling is an essential service and most of our staff are supported employees, the following requirements for visiting tour groups will help minimise our COVID-19 risk.

Thank you for supporting us in keeping everyone safe and healthy and our site operational.

- Provide a final list of visitors' names to Kurrajong Recycling prior to tours for contact tracing purposes. We cannot accept any new people on the day of the tour.
- We can only accommodate groups of 28 people (max.) due to physical distancing requirements. The minimum number for tours is 15 people.
- Any person in your group who has flu/cold-like symptoms (e.g. cough, sore throat, temperature, fatigue, loss of taste or smell) is not permitted on site.
- Any person in your group who has tested positive to COVID-19 within the last 10 days, or is a current close contact is not permitted on site at Kurrajong Recycling as per Government regulations. Please note a 10 day exclusion period applies to visitors and staff in disability organisations.
- Bring your own face masks and wear whilst on site. This only applies to high school students and adult visitors.
- Observe physical distancing of at least 1.5m from other tour attendees and Kurrajong staff where possible and avoid hand shaking and hugs.
- Observe person hygiene such as hand washing, sanitiser use, and coughing or sneezing into your elbow.
- All tour attendees must wear a high visibility vest and safety glasses for the tour as instructed by your tour guide. The personal safety equipment is provided by Kurrajong for your use.
- All adult tour attendees who are eligible must be at least double vaccinated against COVID-19.
